From the velvet curtains to the fun pillows decorating the comfortable couches, the Living Room, located in the lobby of the W New Orleans, creates an intimate and inviting area for guests to relax, people watch and play. Without traditional lobby walls, the Living Room is as alive as the spirit of New Orleans itself, featuring high ceilings, coconut wood floors, custom made black leather ottomans and a communal gaming table where guests can soak in the atmosphere with a relaxing game of chess or backgammon. Nuzzled underneath the grand staircase to the restaurant is a hidden martini lounge with faux-leopard skin built-in banquettes, designed for a more intimate lounging experience. The Living Room is the perfect remedy to those hot New Orleans nights, with its cool, sexy and sophisticated atmosphere.
